

# Drives

## Upgrades & Replacements

- a.c, d.c and shaftless technology ✓
- Reduced risk of lengthy downtime ✓
- Increased reliability ✓
- Enhanced diagnostics ✓
- Better fault-finding ✓
- Off-the-shelf components ✓
- 24 x 7 remote support ✓
- Improved power factor ✓
- Reduced maintenance costs ✓
- Multiple drive masters ✓

Harland Simon has been supplying drive systems to the newspaper industry for more than 30 years. Originally we designed and manufactured our own drives and we retain that expertise and know the importance of a well-implemented drive system.

The main reason for replacing an ageing drive system is to reduce the likelihood of a drive failure stopping production. Even though a properly implemented system will have a degree of redundancy inbuilt, a failure may necessitate running at lower speeds and missing deadlines. Sourcing replacements could take several days at best and in the worst case they may not be available at all.

Although older presses may still run well and produce good copies, the drives that were installed with them might well include obsolete components. Replacing the drive system as a controlled project, perhaps over a period of time, rather than in response to a breakdown could save days or even weeks of disrupted production.

A new system will also offer improved diagnostics and fault-finding with the advantages of 24x7 support and reduced maintenance costs.

# Integration Automation Control

Integrate third-party equipment. Automate manual processes.  
Control your production with a **Harland Simon** system.

**Harland Simon** can control and manage your production throughout the entire process. For more than twenty five years we have provided solutions for the world's most demanding newspaper printers. If you're buying new equipment, our experience and technical expertise mean we can work in partnership with your choice of manufacturer to give you state-of-the-art functionality built on an industry-standard platform.

If you're considering upgrading your site, we can make your day-to-day production secure by eliminating troublesome and unsupported components. We can improve quality and reduce costs with a range of enhancements from pre-press right through to the mailroom. We can provide the tools you need to analyse production and diagnose faults quickly and offer 24x7 support when you need it. We can put you in control.
