Totalizer MIS provides:

- Copy counting ✓
- Bundle counting ✓
- Stop reason & downtime analysis ✓
- Production scheduling ✓
- Production monitoring ✓
- Reporting ✓

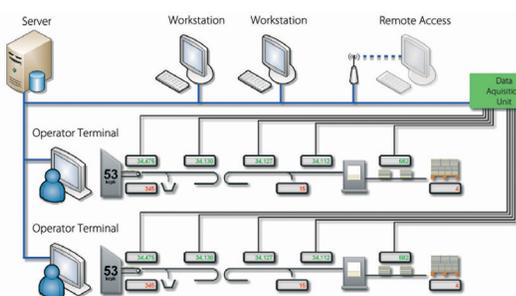

Optional integrated modules:

- Roll Tracking System (RTS) ✓
- Presstimator - Web Estimating ✓
- Crew scheduling ✓

Totalizer Management Information System (MIS) is designed to provide essential information to print production management. It allows management to focus on maximizing efficiency and reducing costs by providing accurate information on raw materials, waste, machine utilization, downtime and stop reasons.

The complete system will allow monitoring of the production process from the moment copies come off the press until it leaves as the finished product. Totalizer MIS pulls together information from the press hall and mailroom to provide real-time monitoring and historic reporting, minimizing the need for manual data input. Information is collected during the run via sensors and directly from operator input. Reports can then be generated immediately without staff having to manually enter data after the event.

The Harland Simon Totalizer MIS is a premium product that has been continually developed and tested over two decades to provide the very best, most robust and reliable copy counting system. Its modular and scalable design means it is suitable for printers of all sizes and it is priced accordingly.

Integration Automation Control

Integrate third-party equipment. Automate manual processes.
Control your production with a **Harland Simon** system.

Harland Simon can control and manage your production throughout the entire process. For more than twenty five years we have provided solutions for the world's most demanding newspaper printers. If you're buying new equipment, our experience and technical expertise mean we can work in partnership with your choice of manufacturer to give you state-of-the-art functionality built on an industry-standard platform.

If you're considering upgrading your site, we can make your day-to-day production secure by eliminating troublesome and unsupported components. We can improve quality and reduce costs with a range of enhancements from pre-press right through to the mailroom. We can provide the tools you need to analyse production and diagnose faults quickly and offer 24x7 support when you need it. We can put you in control.
